Project 2025

*Here are a **few** highlights from the Republican plan to enthrone a dictator; destroy the civil service; legalize race, gender, and sex discrimination; give public assets to billionaires; and make America sick, weak, and ignorant. For **more information**, visit sandvote.org.*

▶ Put the ***entire federal bureaucracy under the direct control of Trump***. Eliminate job protections for federal civil servants, so they can be replaced by ***political appointees***.

▶ Slash funding for the ***Department of Justice,*** instituting a "a top-to-bottom overhaul" of it, the ***FBI***, and ***Department of Homeland Security***, all in support of ***Trump***.

▶ ***Dismantle the Department of Education*** with the goal of ending it entirely, transferring its programs to the states, which may decide to ***close secular public schools***. ***Eliminate Headstart.***

▶ ***Abolish the Federal Reserve*** and consider "a return to the gold standard."

▶ Extend Trump's 2017 ***tax cuts for the rich***, adding $4 trillion to the deficit.

▶ ***Criminalize abortion and move toward exclusion of all birth control.***

▶ ***Shrink Medicaid*** through a variety of asset tests, work requirements, time limits, eliminated benefits, and reduced federal funding. ***Hamstring Medicare's ability to negotiate drug prices.***

▶ ***Defund the National Institutes of Health*** (NIH) and reform it along "conservative principles."

▶ ***Restrict voting rights*** with strict voter ID laws and limit mail-in and early voting.

▶ ***Legalize*** racial, gender, and sexual identity ***discrimination*** on the basis of "sincerely held religious beliefs." ***Terminate*** all diversity, equity, and inclusion (***DEI***) programs and **affirmative action** initiatives across the federal government. ***Prevent*** the federal government from enforcing ***anti-discrimination protections*** in housing, employment, and education.

▶ ***Defund renewable energy*** research and climate change initiatives and ***boost fossil fuel*** production (Drill, Baby, Drill).

▶ Create a "conservative" Environmental Protection Agency (EPA) to ***support polluters*** and ***ignore signs of climate change***.

▶ Dismantle (and destroy) the National Oceanic and Atmospheric Administration, so it can ***stop collecting data on climate change***. ***Sell the National Weather Service*** to commercial weather companies, like AccuWeather.

▶ Open public lands, like ***National Parks and Monuments***, to ***drilling, mining***, and other ***exploitation***.

▶ ***Weaken labor unions*** by restricting union organizing and elections and tossing out established labor law and regulations.

▶ Enact ***mass deportations*** of "illegal" immigrants.

▶ Promote "***patriotic education***" that emphasizes white Christianity and downplays the history of American slavery.

▶ ***Reduce benefits for veterans***.
